Thrissur, Kerala, 680751, IN, Thrissur, Kerala, 680751, IN

I specialize in building robust backend systems and scalable web applications using Python, Django, and React. Skilled in RESTful API design, database optimization, and third-party integrations. I oversee end-to-end delivery—from architecture and deployment to quality assurance—while managing client communication and key documentation.

## Work Experience

### Freelance Backend Developer
Jul 2025 - Present

Acted as Team Lead and Project Coordinator, managing client communication, defining project goals, and coordinating team efforts to ensure timely, high-quality delivery. Handled proposals, invoices, and documentation to maintain smooth collaboration between clients and the development team.

- Developed custom web applications and APIs using Django, FastAPI, React,PostgreSql.
- Integrated third-party services like payment gateways and SMS APIs.
- Deployed projects on Hostinger VPS ,Railway ,cPanel.

### Jr. Software Developer
Aug 2024 - Jul 2025
*EXTRA MIND TECHNOLOGIES*

At ExtramindTech, I work as a backend developer, building robust APIs and scalable backend systems, ensuring seamless data flow and efficient server-side operations for diverse client projects.

- Developed backend functionalities using Django and Django REST Framework.
- Enhanced Devlok Real Estate CRM and Broadway App.
- Managed deployments ensuring project stability.

### Python Fullstack Developer
Feb 2024 - Aug 2024
*ATEES INDUSTRIAL TRAINING CENTRE*

Worked as a backend developer, gaining hands-on experience with real-world projects, building APIs, and developing scalable backend systems while collaborating effectively with teams to deliver practical solutions.

- Developed full-stack applications using Django, React.js, PostgreSQL.
- Built APIs and responsive frontends for real projects.

## Projects

### Devlok CRM (Real Estate CRM)
Apr 2025 - May 2025

Led Devlok CRM, coordinating with clients and team to streamline real estate operations. Built with React frontend, Python Django REST Framework backend, MySQL, Celery, Daphne, and Redis. Automated workflows for lead capture, property-lead matching, WhatsApp reminders, and real-time data sync.

### Broadway App (Multi-Service Booking Platform)
Mar 2024 - Jun 2024

Worked on the backend of Broadway, a multifunctional application with Food Ordering, Job Application, and more. Built APIs for the Food Ordering and Job Application sections using Python Django REST Framework, ensuring smooth data flow and efficient backend operations.

**SROP(Smart Retail Operating Platform)** <span style="float:right">Present</span>

Currently conceptualizing SROP, an AI-integrated ERP for mid-level local ventures. Aiming to simplify EMI tracking, inventory management, billing, and sales insights, providing intelligent, data-driven tools to streamline operations and enhance business decision-making.

## Core Skills

**Core Skills:** Python, Django REST Framework, FastAPI, React, PostgreSQL, REST APIs, Postman, Cloud VPS, Redis, Celery

## Education

**IGNOU University** <span style="float:right">Jul 2021 - Jul 2024</span>

**BA (Hons)**  Sociology

## Awards

**Python Fullstack Developer Certificate**
*ATEES Industrial Training Center, Thrissur*

**React Bootcamp Certificate**
*LetsUpgrade.in*

**Postman API Fundamentals Expert Badge**

**NCC Army Senior Division C certificate**
*National Cadet Corps*
